Re: Jupiter Lakes Villas

Date: 03/04/2024

During the time frame of February 19, 2024-March 4, 2024 Jupiter Lake Villas' roofs for 34 Buildings in their complex located at 431 Jupiter Lakes Blvd in Jupiter were retrofitted to qualify for a "Single Wraps" credit. The "Roof to wall Attachment" was enhanced when the truss straps were augmented with additional 9 gage 1 ½" galvanized nails, which were hammered into all the truss straps in accordance with the guidelines set forth in the OIR-B1-1802 (Rev 01/12) Uniform Mitigation Verification Inspection Form. Subsequently, the roof to wall attachments now have visible metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side and a minimum of 2 nails on the opposing side. They are attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter and are free of severe corrosion.

**Building #'s 2101-2134 were included in retrofit.**

After the work was completed, an inspection was performed for each building by Doug Sammons a licensed contractor. I can be reached by phone at 772 888 0330. My license # is CRC1326546
